

DUAL REEL AUTOMATIC TAKE-UP

Innovative Flexible Material Spooling & Coiling Solutions

Dual Reel Automatic Take-Up

Tulsa Power, Inc's new line of Automatic Dual Reel Take Up systems offers high speed material processing and durability for long operational life. Each system is equipped with shaftless reel handling capabilities and can be outfitted with hydraulic reel lift tables accommodating a variety of reel flange diameters. The parallel axis design allows for reliable automatic switch over. Both Take-Up positions share a heavy duty dual axis linear style traversing assembly providing for superior level wind capabilities. The entire system is controlled by furnished operator touch screen interface allowing input of material OD's reel width, traverse dwell and automatic home settings.

Available Options:

- Color touchscreen on take-up and payoff allows complete operator control and maintenance access
- Independent load control stations for convenient load access

Model	Capacity (each side) (lbs/kg)	Diameter (in/mm)	Width (in/mm)	Speed (FPM/MPM)
HSDRTU-24	500/227	24/610	14/356	2,500/762
HSDRTU-30	1,000/454	30/762	18/457	2,000/610
HSDRTU-36	1,500/680	36/914	24/610	1,500/457
