

# WKT3 BUDGET SERIES

## Lighter Duty Re-Spooling & Coiling Operations

The WK Series Spooling and Coiling equipment is perfect for light to moderate duty applications. Take-ups are standard with a 1 3/8" O.D. shaft with bushings for 2", 2 1/2" and 3" arbor holes.

Utilization of a Hydraulic Jack allows reel to be raised and lowered with ease, eliminating the need to "tilt" and ergonomic strain (back-strain) problems.
